## EXPERIENCE

### Junior Developer

#### The Flood Team

2021 - 2023 Remote

Implemented, tested, and maintained new features for The Flood Team App using HTML CSS and Typescript.

- Developed customizable email templates using HTML, CSS, and Handlebars, incorporating dynamic data fields to automate email generation and improve efficiency.
- Implemented application tools to increase internal production.
- Resolved several software bugs, enhancing overall application functionality.
- Optimized the global state management system, significantly reducing data fetch times and improving overall user experience.

### Owner / Full Stack Developer

#### Kutsolutions

2023 - Present Remote

Focus on personalized web solutions that resonate with the specific interests, values, and behaviors of targeted audiences.

- Leveraged React components to build a reusable and consistent UI within the application
- Developed client-side authentication using React's Context API to manage and maintain user authentication state.
- Implemented RESTful endpoints using Node.js and Express to handle server-side functionality.
- Implemented middleware to secure Express endpoints, ensuring proper access control for both admin and client roles.
- Developed the Consent Companion website using server-side rendering (SSR) with Astro for optimized performance and seamless user experience.

## EDUCATION

### Self Taught HTML, CSS and Javascript

#### Self Taught

2021 - 2022

### Professional Certificate in Full Stack Software Development (MERN stack)

#### TexasMcCombs Great Learning

2023 - 2024

## STRENGTHS

#### Reliability

Successfully completed complex projects during my Junior tenure, consistently meeting demanding deadlines.

#### Teamwork

Contributed to a team-oriented environment that enhanced application quality and bug resolving.

#### Adaptability

Quickly acquired proficiency in various libraries and technologies, including Handlebars, MJML, StencilJS, Puppeteer, Express, and Firebase, within my first year.

## SKILLS

Typescript	Firebase	Tailwind
React	Express	Jest
SQL		
Git and GitHub	Stripe	Mongo
